

Structure Data of Free Polyatomic Molecules

147 MW	CKrO	Carbon monoxide – krypton (1/1) (weakly bound complex)	C_s (effective symmetry class) (large-amplitude motion) CO · Kr
------------------	-------------	--	---

r_0	\AA	θ_0	deg
R_{cm}	3.949(1)	O–cm...Kr ^{a)}	87.0(24)

The intermolecular stretching force constant k_σ is 0.68 N m^{–1}.

^{a)} cm denotes the center of mass of CO.
