

449
ED $\text{C}_3\text{H}_3\text{ISn}$

Iodotrimethylstannane

 C_{3v} assumed

r_a	\AA^a	θ_a	deg^a
Sn–C	2.126(2)	I–Sn–C	107.3(3)
Sn–I	2.695(1)	Sn–C–H	113.5(8)
C–H	1.080(6)		

Local C_{3v} symmetry and the staggered positions with respect to the Sn–I bond were assumed for the methyl groups.

The nozzle temperature was 25 °C.

^a) Estimated standard errors.
