

<b>Colloids</b>	storage capacity of Kupffer cells and of the RES (e.g. $^{99m}\text{Tc}$ sulphur or albumin colloids)
<b>Iminodiacetate derivatives</b>	uptake, transformation and excretion by the hepatocytes (e.g. IDA, HIDA, DISIDA)
<b>Galactosyl neoglycoalbumin</b>	hepatocyte-specific ligand
<b>Erythrocytes</b>	pooling and perfusion (e.g. $^{99m}\text{TcO}_4$ )
<b>Homotaurocholic acid</b>	bile flow (e.g. $^{75}\text{Se}$ HCA)
<b>Carcinoma antibodies</b>	immunoscintigraphy in colorectal liver metastases (e.g. $^{99m}\text{Tc}$ AB CEA)
