

1. **Determination of potential risk factors**

(obesity, alcohol, diabetes, gout, malnutrition, chemicals, hyperlipidaemia, medication, *etc.*)

2. **Hepatomegaly** **Splenomegaly**

3. **Laboratory parameters**

- γ -GT \uparrow , GPT \uparrow , GOT \uparrow
- cholinesterase \uparrow , ferritin \uparrow
- galactose elimination capacity +
- indocyanine green test +
- alkaline phosphatase \uparrow
- triglycerides \uparrow , cholesterol \uparrow , glucose \uparrow
- lipid electrophoresis +, leptin \uparrow , thioresdoxin \uparrow

4. **Sonography** **CT**

5. **Morphology**

- percutaneous biopsy
- laparoscopy + biopsy
