

1. Water-salt balance-regulating hormones

- renin, angiotensin, aldosterone, *etc.*
- mineralocorticoids
- atrial natriuretic peptides
- vasopressin

2. Effector hormones

- catecholamines (adrenalin, noradrenalin, dopamine)
- insulin, glucagon

3. Personality-differentiating hormones

- ACTH, STH, TSH, TRH, FSH, LH, PL, MSH
- thyroxine (T_4), triiodothyronine (T_3)
- androgens, oestrogens, gestagens, progesterones
- glucocorticoids

4. Calcium phosphate metabolism-regulating hormones

- parathormones, 1,25 dihydroxycholecalciferol, calcitonin

5. Gastrointestinal hormones

- bombesin, cholecystokinin-pancreozymin, entero-gastrones, gastrin, GIP, motilin, neurotensin, secretin, somatomedin, somatostatin, substance P, VIP
