

Annotations from editors to layout

General Annotations:

- **Referring to main structure of the book:** the papers are arranged in three main sections (1. Maps and Technology; 2. Mapping Cities: Lyons and Barcelona as case studies; 3. Mapping Humanities)– in addition there are a „Preface“ ahead the first section and a „Comment“ after the last section – to give the titles of the different sections a appearance we have added the section-title to the first paper of the corresponding section (this is: “1. Maps and Technology” in: SchoenherrRau01_Rodger.doc; “2. Mapping Cities: Lyons and Barcelona as case studies” in SchoenherrRau05_GauthiezZeller.doc, and “3. Mapping Humanities” in SchoenherrRau07_Rau.doc)
- **Referring to Pictures:** to Figures which should take a full page we have given a full page in the manuscript too, but we did not rotate the picture – that should you do accordingly to the position of the page where it appears (right? left?)

On the different papers:

- **01_Rodger:** there are two movies prepared for the e-version of the book (SchoenherrRau01_Rodger_Vid_02_geocoding; SchoenherrRau01_Rodger_Vid_02_Measuring_distance_and_area) – please insert the movies into the e-version and delete the corresponding references in the print-version (subtitles of Fig. 4); thank you
- **03_Morton_et_al:** here is a number of Figures for the full-page-presentation – please adjust and rotate if necessary
- **05_Gauthiez_Zeller:** here is a number of Figures for the full-page-presentation – please adjust and rotate if necessary
- **The same in some other papers**

If everything is fine, in the end the **Table of Content** should be the following:

Preface

Susanne Rau, Ekkehard Schönherr

Part I Maps and Technology

1. **When History meets Geography: The Visualising Urban Geographies Project**
Richard Rodger
2. **Thoughts on a web based co-productive spatio-temporal information system**
Leif Scheuermann
3. **Peopling the Past: Interpreting Models for Pedestrian Movement in Ancient Civic-Ceremonial Centres**
Shawn G. Morton, Meaghan M. Peuramaki-Brown, Peter C. Dawson, Jeffrey D. Seibert
4. **Mapping Socio-Spatial Relations in the Urban Built Environment through Time: Describing the Socio-spatial Significance of Inhabiting Urban Form**
Benjamin N. Vis

Part II Mapping Cities: Lyon and Barcelona as case studies

5. **Lyons, the spatial analysis of a city in the 17th and 18th centuries. Locating and crossing data in a GIS built from written sources**
Bernard Gauthiez, Olivier Zeller
6. **Mapping Long-term Urban Space Structures. Barcelona as a Case Study**
Manel Guàrdia Bassols

Part III Mapping Humanities

7. **Writing Spatial Relations and Dynamics. Movements in urban space (Barcelona, 16th – 19th century)**
Susanne Rau
8. **Revisiting social relations: towards a different phenomenology of places**
Stephen Read
9. **The Cartographic Representation and Analysis of (Slovene) Writer-Careers: Methodology and First Results of the Slovene Project**
Urška Perenič
10. **Elements of historical knowledge about urban spaces. Reflections on the requirements for a dynamic map**
Ekkehard Schönherr
11. **Comment**
Wolfgang Spickermann
