

You chose the Print Version. To continue you must first print the chapter to be studied. Each page contains two frames of the study guide.

You will find the first frames of the chapter in the upper part of the pages. While working through you will see the answers to a given question only after having turned over the page.

When finished with the first half of the chapter you must go back to the beginning page and work through the frames on the lower part of the page.

All necessary information will be given during the course at due time.

Now have the first chapter printed and fold the pages appropriately.

Click the button "Print".
